

CS 480 / CS 481 ~ PROJECT
BETA TEST CERTIFICATION

STUDENT: _____

CUSTOMER: _____

PROJECT: _____

Each CS480/CS481 project student is required to conduct a beta test of the product he/she is developing. We do this to help ensure that their customer receives a solid product. As a beta test volunteer we would appreciate it if you could take time to use and evaluate the current version of the product to see if the product's features, behavior, and user interface perform as you think they should. At this stage, all of the product features should actually work. We have asked the product developer (CS480/CS481 student) **not** to lead you through the operation of this system, but you are free to ask questions if you are uncertain about what the system should do in a particular situation. We are especially interested in seeing if there are portions of the product that fail when put to actual use. We are conducting this evaluation now, so that any necessary changes can be incorporated before the final product release. If you discover anything that you think is a product failure (defect, bug, etc.) please record as much information as you can that will describe the problem and what you were doing at the time you noticed the problem.

Name of Person Performing Beta Test: _____

Date(s) Beta Test conducted: _____

Please answer the questions below and return this form to:

Heather Hunting

P.O. Box 273

Menan, ID 83434

(or email to heather.hunting@gmail.com)

Did the program appear to be a reasonably complete and accurate implementation of the features you expected to see in a product such as this?

Yes No Not sure

If the answer to the above question is "No" or "Not sure" what additional features do you think should be included in the product?

Based on your use of the product, did you identify any suspected problem(s) with the product?

Yes No

If the answer above is yes, did you provide a written description of the problem(s) to the product developer? Please briefly describe the suspected problem(s).

Yes No
